

Using ICT in school to enhance Learning

'ICT is not intrinsically good or bad, but depends for its value on how it is used. Quality learning requires attention to be paid to the relationships between the use of new technologies and subject matter, the nature of the learner, and approaches to teaching and assessment'. (TLRP and ESRC (2006) *Improving Teaching and Learning in Schools*)

Leading Learning, Vital and iLab are working together to help develop your capacity to use technology to enhance learning in and beyond the classroom. This exciting pilot offers you the opportunity to develop your skills and confidence in using a range of new technology. It will also ensure you understand how to use that technology to make a positive contribution to student learning.

During the four sessions we will investigate the contribution technology can make to:

- Differentiation
- Effective group work
- Formative assessment and feedback
- Enquiry based curriculum
- Learner autonomy
- Effective home learning

Using a range of technology including:

- Social networking
- Blogging
- Web2 Technologies
- Hand held technologies

This series of learning opportunities promotes an enquiry based approach to professional learning. In addition to attending all four sessions delegates will be encouraged to trial these technologies in school and reflect on their contribution to student learning.

Dates

21st September	9.00 – 12.00
3rd November	4.00 – 6.00
1st December	9.00 – 12.00
19th January	4.00 – 6.00

Cost £275.00 per person for all four sessions! Take advantage of this reduced cost by being part of one of our pilot networks.
